Slot: D

Course Name: Internet Programming

Course Faculty: Dr. D.Sudhagar.D

Project Title: Integrated Hotel Room Booking and Guest Experience Portal

Module Photographs:

Module Description:

The User Portal provides a simple and user-friendly interface for hotel guests. Users can register and securely log in to the system. They can search for hotels by city and view room images, prices, facilities, and availability. Guests can select a suitable room and make an online reservation. They can also view their booking history and cancel bookings when required. This module makes the hotel-booking process fast and convenient. The User Portal allows guests to register, search for hotels, and view room details and availability. Users can book suitable rooms and check their booking history. It provides a simple and convenient reservation experience.
